

#PROJECTACNE

As part of our PDH&PE program, we will be introducing lessons that focus specifically on acne.

Acne is one of the most common skin conditions affecting teenagers, with approximately 85% experiencing it at some point during adolescence. For many teens acne undermines their self-confidence and can affect both school and social interactions.

#PROJECTACNE is supported by the **Skin & Cancer Foundation Inc** and is designed to provide students with reliable information about acne and skin care.

THE GOAL OF THE PROGRAM IS TO HELP STUDENTS:

- Understand the causes of acne
- Talk about the physical, emotional and social effects of acne
- Identify appropriate resources, services and treatments

By raising awareness and talking about treatment options, we can help to lessen the physical and emotional impacts of acne.

#PROJECTACNE

Brought to you by the **Skin & Cancer Foundation Inc**

Sponsored by Galderma, Australia.

Date of preparation: September 2017. OTH16-11-0015h.
