

#PROJECTACNE

As part of our PDH&PE program, we will be introducing lessons that focus specifically on acne. Acne is one of the most common skin conditions affecting teenagers, with approximately 85% experiencing it at some point during adolescence.

#PROJECTACNE is supported by the **Skin & Cancer Foundation Inc** and is designed to provide students with reliable information about acne and skin care. By raising awareness and talking about treatment options, we can help to lessen the physical and emotional impacts of acne.

#PROJECTACNE

Brought to you by the **Skin & Cancer Foundation Inc**

Sponsored by Galderma, Australia.

Date of preparation: September 2017. OTH16-11-0015h.
